Subject: Availability next week -

Hi Guys -

We really need help for the field sampling teams next week for Dimock. You would accompany the teams of samplers (START, DEP and Cabot contractors). We are set for this week (Francisco, you don't need to come up this week, btw) and the week of the 13th but are having problems with next week beginning the 6th (mobe Sunday, ready to work on Monday 0730). Could you guys let me know asap if you are available? I may need to reach out to the RSC and that takes more time than just an email with those folks!
